

## Demisters

When foods are fried, oils will form into droplets into the air. PSG Mist Eliminators eliminate stack build up and oil residue on and around roof surfaces.

### Product Description

Demisters are a mesh-type coalescer, vane pack, or other media used to aggregate the mist into droplets that are heavy enough to separate from the vapor stream.

- Sizing and filtration design is based on pressure, temperature, and micron size of particles
- Steam CIP nozzles purge the filter media and clean the Demister
- Sanitary design 304 stainless steel construction
